INDEX OF SUBJECTS AND AUTHORS

Abdominal lymph nodes, Calcified, 447

Adipose tissue, transformation of, following experimental tuberculosis, The, 587

Adults, intracutaneous (Mantoux) test in, The value of the, 190

ALEXANDER, JOHN, AND JONES, JOHN C. Results in 70 consecutive cases of tuberculous empyema, 230

——, ——, —— MCINDOE, R. B. Extrapleural paraffin pneumonolysis for phthisis, 270

Anatomical changes in the diaphragm following phrenicectomy, 528

—— contributions to primary and post-primary human pulmonary tuberculosis, 77

Animals, cold-blooded, growth of tubercle bacilli from, micro-motion-picture study of the, A, 389

Apparatus, artificial-pneumothorax, portable, A, 558

Artificial-pneumothorax apparatus, portable, A, 558

—— ——, X-ray observations in, correlation of shifting electrical axis of the heart with, The, 546

Axis, shifting electrical, of the heart, correlation of, with X-ray observations in artificial pneumothorax, The, 546

Bacilli, fractured, natural tuberculin prepared from, desensitization of tuberculous guinea pigs by means of, The, 660

——, Tubercle, and monilia, 239

——, ——, cream-egg culture medium for, A review of the, 638

——, ——, cultivating, method of, successful, A, 368

——, ——, growth of, from cold-blooded animals, micro-motion-picture study of the, A, 389

——, ——, —— ——, inhibitory action of sulphur on, The, 650

Bacilli, tubercle, human and bovine, Pathological changes, induced in chickens by, 415

——, ——, —— —— ——, susceptibility of chickens to, The, 400

——, ——, in the gastric contents of tuberculous children, 461

——, ——, —— —— sputum and faeces of children without pulmonary tuberculosis, 481

——, ——, —— —— ——, faeces and stomach contents of tuberculous children, demonstration of, The, 471

Bacteria, chemical study of, The, 66

BAITSELL, GEORGE A., AND MASON, KARL E. The transformation of adipose tissue following experimental tuberculosis, 587

BANYAI, ANDREW L. Therapeutic pneumoperitoneum, 603

BCG, non-acid-fast form in a culture of, spontaneous occurrence of a, The, 571

Behavior of pleural effusion in hydropneumothorax, The, 329

Bilateral collapse therapy in pulmonary tuberculosis, 284

Blood-pressure variations in tuberculosis, 335

Blood-sedimentation indices, simplified technique for, A, 214

—— —— time, Linzenmeier, in tuberculous children, The, 220

BOOK REVIEWS:

DAVIES, H. MORRISTON: Pulmonary tuberculosis: medical and surgical treatment, 102

GISSEL, H. AND SCHMIDT, P. G.: Die Lungentuberkulose, 105

ASCOLI, M., AND LUCACER, M.: Simultaneous bilateral pneumothorax, 106

LAURENS, HENRY: Physiological effects of radiant energy, 108

KRUSEN, FRANK HAMMOND: Light therapy, 111

BOOK REVIEWS:—*Continued*
ST. ENGEL AND PIRQUET: Handbuch der Kindertuberkulose, 114
BRADBURY, F. C. S.: Causal factors in tuberculosis, 115
WILSON, G. S.: Tuberculous bacillaemia, 117
MELZER, ERNST: Der Einfluss der Tuberkulose auf das Seelenleben des Kranken, 119
HEYMANN, BRUNO: Robert Koch, 120
Bovine tubercle bacilli, human and, susceptibility of chickens to, The, 400
—— —— ——, Pathological changes induced in chickens by human and, 415
BUNTA, EMIL. A portable artificial-pneumothorax apparatus, 558
——, ——. Blood-pressure variations in tuberculosis, 335
BUTLER, CHARLES P., SEWALL, HENRY, AND DE SAVITSCH, EUGENE. The time-interval between primary infection and superinfection as a factor in immunity to tuberculosis, 373

Calcified abdominal lymph nodes, 447
Carbohydrates, complex, Studies on the, isolated from the culture medium and and its ultrafiltrate after the growth of tubercle bacilli. The chemical study of bacteria, 66
Cavities, tuberculous, pulmonary, Changes in, resulting from induced paralysis of the diaphragm, 629
Changes in pulmonary tuberculous cavities resulting from induced paralysis of the diaphragm, 629
Chemical study of bacteria, The, 66
Chickens, Pathological changes induced in, by human and bovine tubercle bacilli, 415
——, susceptibility of, to human and bovine tubercle bacilli, The, 400
Childhood tuberculosis, tuberculin reaction in, quantitative study of the, A, 652
—— type tuberculosis, 424
Children, Negro, Tuberculosis in, 430
—— of tuberculous parents, Tuberculosis among the, 123
——, public-school, tuberculosis in, study of, A further, 142
Children, pulmonary tuberculosis in, Certain aspects of, 577
——, tuberculous, Linzenmeier blood-sedimentation time in, The, 220
——, ——, Tubercle bacilli in the gastric contents of, 461
——, ——, —— —— —— —— sputum, faeces and stomach contents of, demonstration of, The, 471
—— without pulmonary tuberculosis, Tubercle bacilli in the sputum and faeces of, 481
Clinic and contact study, Tuberculosis, 170
Clinical aspects of silicosis and silicosis with tuberculosis, The, 36
—— features of pulmonary tuberculosis, 362
Coal-miners, gold-miners and, Silicosis in, 17
Cold-blooded animals, growth of tubercle bacilli from, micro-motion-picture study of the, A, 389
Collapse therapy, Bilateral, in pulmonary tuberculosis, 284
Congenital tuberculosis, Pathological findings and pathogenesis of, 297
Contact, Tuberculosis clinic and, study, 170
Corrected sedimentation rate (*C. S. R.*) in pulmonary tuberculosis, The, 198
Correlation of shifting electrical axis of the heart with X-ray observations in artificial pneumothorax, The, 546
COWEN, M. E., AND HENDERSON, E. J. A successful method of cultivating tubercle bacilli, 368
Cream-egg culture medium for tubercle bacilli, A review of the, 638
(*C. S. R.*), corrected sedimentation rate, in pulmonary tuberculosis, The, 198
Cultivating tubercle bacilli, method of, successful, A, 368
Culture medium, cream-egg, for tubercle bacilli, A review of the, 638
—— of *BCG*, non-acid-fast form in a, spontaneous occurrence of a, The, 571
CUMMINS, S. LYLE. Silicosis in gold-miners and coal-miners, 17
CUTLER, J. W. A scaleniotomy director, 628

Demonstration of tubercle bacilli in the sputum, faeces and stomach contents of tuberculous children, The, 471

DE SAVITSCH, EUGENE, BUTLER, CHARLES P., AND SEWALL, HENRY. The time-interval between primary infection and superinfection as a factor in immunity to tuberculosis, 373
Desensitization of tuberculous guinea pigs by means of natural tuberculin prepared from fractured bacilli, The, 660
Development of tuberculosis, The relation of the ductless glands to the incidence and, 249
Diagnosis of Pott's disease, early, The, 223
Diaphragm, Anatomical changes in the, following phrenicectomy, 528
——, induced paralysis of the, Changes in pulmonary tuberculous cavities resulting from, 629
Director, scaleniotomy, A, 628
Displacement of thoracic viscera resulting from pathological processes in the lung, The, 313
Ductless glands, relation of the, to the incidence and development of tuberculosis, The, 249
DUFAULT, PAUL, AND ROBINSON, DANIEL. Observations on pulmonary tuberculosis in members of the same families, 98
DUNN, EMILY G., EVARTS, HELEN W., AND POTTER, ROSALIND G. Tuberculosis among the children of tuberculous parents, 123

Early diagnosis of Pott's disease, The, 223
ECKER, E. E., AND SIDENBERG, STANLEY S. The spontaneous occurrence of a non-acid-fast form in a culture of *BCG*, 571
Effects of tuberculo-protein (MA-100) on the course of experimental tuberculosis in rabbits and guinea pigs, The, 562
Effusion, pleural, in hydropneumothorax, The behavior of, 329
Egg, cream-, culture medium for tubercle bacilli, A review of the, 638
Electrical axis of the heart, shifting, correlation of, with X-ray observations in artificial pneumothorax, The, 546
Empyema, tuberculous, Results in 70 consecutive cases of, 230
Erythrocyte-sedimentation test, The, 690
EVANOFF, MAX, GROSS, ALVIN, AND SWEANY, HENRY C. A review of the cream-egg culture medium for tubercle bacilli, 638
EVARTS, HELEN W., POTTER, ROSALIND G., AND DUNN, EMILY G. Tuberculosis among the children of tuberculous parents, 123
Experimental tuberculosis in rabbits and guinea pigs, effects of tuberculo-protein (MA-100) on the course of, The, 562
—— ——, transformation of adipose tissue following, The, 587
Extrapleural paraffin pneumonolysis for phthisis, 270

Faeces and stomach contents of tuberculous children, tubercle bacilli in the sputum, demonstration of, The, 471
—— of children without pulmonary tuberculosis, Tubercle bacilli in the sputum and, 481
Families, pulmonary tuberculosis among members of the same, Observations on, 98
FELDMAN, WILLIAM H. Pathological changes induced in chickens by human and bovine tubercle bacilli, 415
——, —— ——. The susceptibility of chickens to human and bovine tubercle bacilli, 400
Fluid-valve in pyopneumothorax, A, 521
Following experimental tuberculosis, transformation of adipose tissue, The, 587
—— phrenicectomy, Anatomical changes in the diaphragm, 528
Food-handlers, tuberculosis survey among 2,000, in New York City, A, 182
Fractured bacilli, natural tuberculin prepared from, desensitization of tuberculous guinea pigs by means of, The, 660
FREILICH, ELLIS B., AND RAGINS, OSCAR B. Clinical features of pulmonary tuberculosis, 362
FRIEDMAN, SAMUEL. The corrected sedimentation rate (*C. S. R.*) in pulmonary tuberculosis, 198

GARDNER, LEROY U. Silicosis and its relationship to tuberculosis, 1

Gastric contents of tuberculous children, Tubercle bacilli in the, 461
GEER, EVERETT K. Primary tuberculosis among nurses, 88
GEIGER, J. T., SMITHBURN, K. C., AND SABIN, F. R. The effects of tuberculo-protein (MA-100) on the course of experimental tuberculosis in rabbits and guinea pigs, 562
GIBSON, COLE B. Calcified abdominal lymph nodes, 447
——, —— ——. Tuberculosis in Negro children, 430
Glands, ductless, relation of the, to the incidence and development of tuberculosis, The, 249
GOLDBERG, JACOB A., MARTIN, D. CLIFFORD, AND PESSAR, HARRY T. A tuberculosis survey among 2,000 food-handlers in New York City, 182
Gold-miners and coal-miners, Silicosis in, 17
GOURLEY, INA. Tubercle bacilli in the gastric contents of tuberculous children, 461
GROSS, ALVIN, SWEANY, HENRY C., AND EVANOFF, MAX. A review of the cream-egg culture medium for tubercle bacilli, 638
Growth of tubercle bacilli from cold-blooded animals, micro-motion-picture study of the, A, 389
—— —— —— ——, inhibitory action of sulphur on, The, 650
Guinea pigs, experimental tuberculosis in rabbits and, effects of tuberculo-protein (MA-100) on the course of, The, 562
—— ——, tuberculous, desensitization of, The, by means of natural tuberculin prepared from fractured bacilli, 660

Haematogenous pulmonary tuberculosis, 489
Haematological retrospect of tuberculosis patients, A, 73
HARRIS, R. I. The early diagnosis of Pott's disease, 223
HAUPTMAN, DAVID, MISHULOW, LUCY, AND KERESZTURI, CAMILLE. The demonstration of tubercle bacilli in the sputum, faeces and stomach contents of tuberculous children, 471
Heart, shifting electrical axis of the, correlation of, with X-ray observations in artificial pneumothorax, The, 546
HENDERSON, E. J., AND COWEN, M. E. A successful method of cultivating tubercle bacilli, 368
HETHERINGTON, H. W., MCPHEDRAN, F. M., LANDIS, H. R. M., AND OPIE, E. L. A further study of tuberculosis in public-school children, 142
History, occupational, and how to make it, The, 61
HOOPER, FLORENCE E., RENFREW, ALICE G., AND JOHNSON, TREAT B. The chemical study of bacteria. Studies on the complex carbohydrates isolated from the culture medium and its ultrafiltrate after the growth of tubercle bacilli, 66
HOWARD, P. J., MARONEY, JOHN, AND JOHNSTON, J. A. A quantitative study of the tuberculin reaction in childhood tuberculosis, 652
HRUBY, ALLAN J., AND JOANNIDES, MINAS. A topographical localization of pulmonary lesions, 310
Human and bovine tubercle bacilli, Pathological changes induced in chickens by, 415
—— —— —— —— ——, susceptibility of chickens to, The, 400
—— pulmonary tuberculosis, primary and postprimary, Anatomical contributions to, 77
Hydropneumothorax, pleural effusions in, behavior of, The, 329

Immunity to tuberculosis, time-interval between primary infection and superinfection as a factor in, The, 373
Incidence and development of tuberculosis, The relation of the ductless glands to the, 249
—— of tuberculosis, The prevalence of silicosis and its effects upon the, 8
Indices, blood-sedimentation, simplified technique for, A, 214
Induced paralysis of the diaphragm, Changes in pulmonary tuberculous cavities resulting from, 629

Infection, primary, and superinfection, time-interval between, as a factor in immunity to tuberculosis, The, 373
Inhibitory action of sulphur on the growth of tubercle bacilli, The, 650
Intracutaneous (Mantoux) test in adults, The value of the, 190

JOANNIDES, MINAS. The behavior of pleural effusions in hydropneumothorax, 329
——, ——. The displacement of intrathoracic viscera resulting from pathological processes in the lung, 313
——, ——, AND HRUBY, ALLAN J. A topographical localization of pulmonary lesions, 310
JOHNSON, TREAT B., HOOPER, FLORENCE E., AND RENFREW, ALICE G. The chemical study of bacteria. Studies on the complex carbohydrates isolated from the culture medium and its ultrafiltrate after the growth of tubercle bacilli, 66
JOHNSTON, J. A., HOWARD, P. J., AND MARONEY, JOHN. A quantitative study of the tuberculin reaction in childhood tuberculosis, 652
JONES, JOHN C., AND ALEXANDER, JOHN. Results in 70 consecutive cases of tuberculous empyema, 230

KERESZTURI, CAMILLE, HAUPTMAN, DAVID, AND MISHULOW, LUCY. The demonstration of tubercle bacilli in the sputum, faeces and stomach contents of tuberculous children, 471

LANDIS, H. R. M., OPIE, E. L., HETHERINGTON, H. W., AND MCPHEDRAN, F. M. A further study of tuberculosis in public-school children, 142
LANZA, A. J., AND VANE, ROBERT J. The prevalence of silicosis and its effects upon the incidence of tuberculosis, 8
LAWSON, GEORGE B. The inhibitory action of sulphur on the growth of tubercle bacilli, 650
LEGGETT, ELIZABETH A., MYERS, J. ARTHUR, AND LEVINE, IDA. Spontaneous pneumothorax, 348
LEVINE, IDA, LEGGETT, ELIZABETH A., AND MYERS, J. ARTHUR. Spontaneous pneumothorax, 348
LICHTENSTEIN, M. R. The value of the intracutaneous (Mantoux) test in adults, 190
Linzenmeier blood-sedimentation time in tuberculous children, The, 220
LISSER, H. The relation of the ductless glands to the incidence and development of tuberculosis, 249
Localization, topographical, of pulmonary lesions, A, 310
LUNDY, C. J., AND TREIGER, I. The correlation of shifting electrical axis of the heart with X-ray observations in artificial pneumothorax, 546
Lung, The displacement of intrathoracic viscera resulting from pathological processes in the, 313
Lymph nodes, abdominal, Calcified, 447

(MA-100), The effects of tuberculo-protein, on the course of experimental tuberculosis in rabbits and guinea pigs, 562
MAHER, STEPHEN J. Tubercle bacilli and monilia, 239
(Mantoux) test, intracutaneous, The value of the, in adults, 190
MARONEY, JOHN, JOHNSTON, J. A., AND HOWARD, P. J. A quantitative study of the tuberculin reaction in childhood tuberculosis, 652
MARTIN, D. CLIFFORD, PESSAR, HARRY T., AND GOLDBERG, JACOB A. A tuberculosis survey among 2,000 food-handlers in New York City, 182

MASTEN, A. R. The erythrocyte-sedimentation test, 690
MCINDOE, R. B., AND ALEXANDER, JOHN. Extrapleural paraffin pneumonolysis for phthisis, 270
MCPHEDRAN, F. M., LANDIS, H. R. M., OPIE, E. L., AND HETHERINGTON, H. W. A further study of tuberculosis in public-school children, 142

Medium, culture, cream-egg, for tubercle bacilli, A review of the, 638
Meningitis, tuberculous, tryptophane test in, The, 668
Method of cultivating tubercle bacilli, successful, A, 368
Micro-motion-picture study of the growth of tubercle bacilli from cold-blooded animals, A, 389
MILLER, JAMES ALEXANDER. Haematogenous pulmonary tuberculosis, 489
Miners, gold- and coal-, Silicosis in, 17
MISHULOW, LUCY, KERESZTURI, CAMILLE, AND HAUPTMAN, DAVID. The demonstration of tubercle bacilli in the sputum, faeces and stomach contents of tuberculous children, 471
Monilia, Tubercle bacilli and, 239
MORGAN, ROY. Certain aspects of pulmonary tuberculosis in children, 577
Motion-picture, micro-, study of the growth of tubercle bacilli from cold-blooded animals, A, 389
MYERS, J. ARTHUR, LEVINE, IDA, AND LEGGETT, ELIZABETH A. Spontaneous pneumothorax, 348

NALBANT, J. P. Tubercle bacilli in the sputum and faeces of children without pulmonary tuberculosis, 481
Natural tuberculin prepared from fractured bacilli, desensitization of tuberculous guinea pigs by means of, The, 660
Negative intracutaneous (Mantoux) test in adults, value of, The, 190
Negro children, Tuberculosis in, 430
New York City, 2,000 food-handlers in, tuberculosis survey among, A, 182
Non-acid-fast form in a culture of *BCG*, spontaneous occurrence of a, The, 571
Nurses, tuberculosis among, Primary, 88

OATWAY, W. H., JR. A haematological retrospect of tuberculosis patients, 73
Observations on pulmonary tuberculosis among members of the same families, 98
Occupational history and how to make it, The, 61
OPIE, E. L., HETHERINGTON, H. W., MCPHEDRAN, F. M., AND LANDIS, H. R. M. A further study of tuberculosis in public-school children, 142

PANCOAST, HENRY K., AND PENDERGRASS, EUGENE P. Roentgenological aspects of simple silicosis and silicotuberculosis, 43
Paraffin pneumonolysis, Extrapleural, for phthisis, 270
Paralysis of the diaphragm, induced, Changes in pulmonary tuberculous cavities resulting from, 629
Parents, tuberculous, children of, Tuberculosis among the, 123
Pathogenesis of congenital tuberculosis, Pathological findings and, 297
Pathological changes induced in chickens by human and bovine tubercle bacilli, 415
—— findings and pathogenesis of congenital tuberculosis, 297
—— processes in the lung, displacement of thoracic viscera resulting from, The, 313
Patients, tuberculosis, haematological retrospect of, A, 73
PENDERGRASS, EUGENE P., AND PANCOAST, HENRY K. Roentgenological aspects of simple silicosis and silicotuberculosis, 43
PESSAR, HARRY T., GOLDBERG, JACOB A., AND MARTIN, D. CLIFFORD. A tuberculosis survey among 2,000 food-handlers in New York City, 182
Phthisis, pneumonolysis, paraffin, Extrapleural, for, 270
Pleural effusion in hydropneumothorax, The behavior of, 329
Pneumonolysis, paraffin, Extrapleural, for phthisis, 270
Pneumoperitoneum, Therapeutic, 603
Pneumothorax, artificial, apparatus, portable, A, 558
——, ——, X-ray observations in, correlation of shifting electrical axis of the heart with, The, 546
——, Spontaneous, 348

POLLOCK, WILLIAM C. Bilateral collapse therapy in pulmonary tuberculosis, 284
Portable artificial-pneumothorax apparatus, A, 558
Postprimary human pulmonary tuberculosis, Anatomical contributions to primary and, 77
POTTER, ROSALIND G., DUNN, EMILY G., AND EVARTS, HELEN W. Tuberculosis among the children of tuberculous parents, 123
Pott's disease, early diagnosis of, The, 223
Pressure, Blood-, variations in tuberculosis, 335
Prevalence of silicosis in the general population and its effects upon the incidence of tuberculosis, The, 8
Primary and postprimary human pulmonary tuberculosis, Anatomical contributions to, 77
—— infection and superinfection, time-interval between, as a factor in immunity to tuberculosis, The, 373
—— tuberculosis among nurses, 88
Public-school children, tuberculosis, in, study of, A further, 142
Pulmonary lesions, topographical localization of, A, 310
—— tuberculosis among members of the same families, Observations on, 98
—— ——, Bilateral collapse therapy in, 284
—— ——, Clinical features of, 362
—— ——, Corrected sedimentation rate (*C. S. R.*) in, The, 198
—— ——, Haematogenous, 489
—— ——, human, primary and postprimary, Anatomical contributions to, 77
—— —— in children, Certain aspects of, 577
—— ——, red-cell sedimentation rate determinations in, repeated, The significance of, 673
—— ——, Tubercle bacilli in the sputum and faeces of children without, 481
—— tuberculous cavities, Changes in, resulting from induced paralysis of the diaphragm, 629
Pyopneumothorax, fluid-valve in, A, 521

Quantitative study of the tuberculin reaction in childhood tuberculosis, A, 652

Rabbits and guinea pigs, experimental tuberculosis in, effects of tuberculo-protein (MA-100) on the course of, The, 562
RAGINS, OSCAR B., AND FREILICH, ELLIS B. Clinical features of pulmonary tuberculosis, 362
Reaction, tuberculin, in childhood tuberculosis, quantitative study of the, A, 652
Red-cell sedimentation rate determinations in pulmonary tuberculosis, repeated, The significance of, 673
REILLY, WILLIAM ANTHONY. The Linzenmeier blood-sedimentation time in tuberculous children, 220
Relation of the ductless glands to the incidence and development of tuberculosis, The, 249
RENFREW, ALICE G., JOHNSON, TREAT B., AND HOOPER, FLORENCE E. The chemical study of bacteria. Studies on the complex carbohydrates isolated from the culture medium and its ultrafiltrate after the growth of tubercle bacilli, 66
Repeated red-cell sedimentation rate determinations in pulmonary tuberculosis, The significance of, 673
Results in 70 consecutive cases of tuberculous empyema, 230
Review of the cream-egg culture medium for tubercle bacilli, A, 638

Spontaneous occurrence of a non-acid-fast form in a culture of *BCG*, The, 571
—— pneumothorax, 348
Sputum and faeces of children without pulmonary tuberculosis, Tubercle bacilli in the, 481
——, faeces and stomach contents of tuberculous children, tubercle bacilli in the, demonstration of, The, 471
STANBURY, W. STUART. Anatomical changes in the diaphragm following phrenicectomy, 528
Stomach contents of tuberculous children, tubercle bacilli in the sputum, faeces and, demonstration of, The, 471
Study of tuberculosis in public-school children, A further, 142
——, Tuberculosis clinic and contact, 170
Successful method of cultivating tubercle bacilli, A, 368
Sulphur, inhibitory action of, on the growth of tubercle bacilli, The, 650
Superinfection, time-interval between primary infection and, as a factor in immunity to tuberculosis, The, 373
Survey, tuberculosis, among 2,000 food-handlers in New York City, A, 182
Susceptibility of chickens to human and bovine tubercle bacilli, The, 400
SUTHERLAND, HALLIDAY. A fluid-valve in pyopneumothorax, 521
SWEANY, HENRY C., EVANOFF, MAX, AND GROSS, ALVIN. A review of the cream-egg culture medium for tubercle bacilli, 638

Technique, simplified, for blood-sedimentation indices, A, 214

TERPLAN, K. Anatomical contributions to primary and postprimary human pulmonary tuberculosis, 77
Test, erythrocyte-sedimentation, The, 690
——, intracutaneous (Mantoux), in adults, The value of the, 190
——, tryptophane, in tuberculous meningitis, The, 668
Therapeutic pneumoperitoneum, 603
Therapy, collapse, Bilateral, in pulmonary tuberculosis, 284
Thoracic viscera, displacement of, The, resulting from pathological processes in the lung, 313
Time-interval between primary infection and superinfection as a factor in immunity to tuberculosis, The, 373
Topographical localization of pulmonary lesions, A, 310
Transformation of adipose tissue following experimental tuberculosis, The, 587
TREIGER, I., AND LUNDY, C. J. The correlation of shifting electrical axis of the heart with X-ray observations in artificial pneumothorax, 546
Tryptophane test in tuberculous meningitis, The, 668
Tubercle bacilli and monilia, 239
—— ——, cream-egg culture medium for, A review of the, 638
—— ——, cultivating, method of, successful, A, 368
—— ——, growth of, from cold-blooded animals, micro-motion-picture study of the, A, 389
—— ——, —— ——, inhibitory action of sulphur on, The, 650
—— ——, human and bovine, Pathological changes induced in chickens by, 415
—— ——, —— —— ——, susceptibility of chickens to, The, 400
—— —— in the gastric contents of tuberculous children, 461
—— —— —— —— sputum and faeces of children without pulmonary tuberculosis, 481
—— —— —— —— ——, faeces and stomach contents of tuberculous children, demonstration of, The, 471
Tuberculin, natural, prepared from fractured bacilli, desensitization of tuberculous guinea pigs by means of, The, 660
—— reaction in childhood tuberculosis, quantitative study of the, A, 652
Tuberculo-protein (MA-100), The effects of, on the course of experimental tuberculosis in rabbits and guinea pigs, 562
Tuberculosis among nurses, Primary, 88
—— —— the children of tuberculous parents, 123
——, Blood-pressure variations in, 335
——, childhood, tuberculin reaction in, quantitative study of the, A, 652
——, Childhood-type, 424
—— clinic and contact study, 170
——, clinical aspects of silicosis and silicosis with, The, 36
——, congenital, Pathological findings and pathogenesis of, 297
——, experimental, in rabbits and guinea pigs, effects of tuberculo-protein (MA-100) on the course of, The, 562
——, ——, transformation of adipose tissue following, The, 587
—— in Negro children, 430
—— —— public-school children, study of, A further, 142
——, incidence and development of, The relation of the ductless glands to the, 249
——, —— of, The prevalence of silicosis and its effects upon the, 8
—— patients, haematological retrospect of, A, 73
——, pulmonary, among members of the same families, Observations on, 98
——, ——, Bilateral collapse therapy in, 284
——, ——, Clinical features of, 362
——, ——, corrected sedimentation rate (*C. S. R.*) in, The, 198
